-  Die einschlägigen Verarbeitungsrichtlinien aller beteiligten Gewerke sind zu berücksichtigen.
-  **1** Beim Einbau müssen gegebenenfalls Unterbauelemente oder ein gegossener Estrichsockel verwendet werden.
-  **2** Randdämmstreifen sind bauseits zu stellen.
-  **3** Bei einer Estrichhöhe von 120 mm muss für den Ablauftopf eine entsprechende Aussparung im Rohfussboden erstellt werden.
-  **4** Für die Installation der Ablaufgarnitur ist die beiliegende Einbauanleitung des Herstellers zu beachten (nicht im Lieferumfang).
-  **5** Das Abdichtset des Rinnen-Herstellers ist zu verwenden (nicht im Lieferumfang).

Einbaubeispiel mit Poresta® BF Unterbauelement:

| | |
|-----------------------------------|---------|
| Aufbauhöhe/Fertigfussboden | 170 mm |
| Poresta® BFR Universalrinnenboard | -120 mm |

-  Substrate elements or a cast plaster floor base may possibly be required for the installation.
-  The relevant processing guidelines of all trades involved must be observed.
-  As regards the installation of the fittings, the enclosed manufacturer's mounting instructions have to be observed (not included in the scope of supply).
-  The use of edge insulation strips is recommended.

Example for installation with Poresta® BF substrate element:

| | |
|--------------------------------------|---------|
| Mounting height/finished floor level | 170 mm |
| Poresta® BFR Universal Grooved Board | -120 mm |
| 2 layers of tile adhesive | -10 mm |
| Poresta® BF substrate element | = 40 mm |

-  Bij montage moeten eventueel onderbouw-elementen of een gegoten estrikondergrond worden toegepast.
-  Met de betreffende toepassingsrichtlijnen van alle betroffen onderdelen moet rekening worden gehouden.
-  Voor de installatie van de armaturen moet gelet worden op de montagehandleiding van de fabrikant (niet in levering inbegrepen).
-  Het gebruik van randdichtingsstroken wordt aanbevolen.

Montagevoorbeeld met Poresta® BF onderbouwelement:

| | |
|------------------------------------|---------|
| Opbouwhoogte/douchebak | 170 mm |
| Poresta® BFR universeel goot-board | -120 mm |
| 2 lagen tegelplakker | -10 mm |
| Poresta® BF onderbouwelement | = 40 mm |

-  Lors de l'installation, il faut utiliser, le cas échéant, des éléments de support de base ou un socle de chape coulé.
-  Les directives correspondantes de mise en oeuvre de tous les métiers participants sont à observer.
-  Pour l'installation de la robinetterie, il faut respecter les instructions de montage jointes du fabricant (pas comprise dans la fourniture).
-  Il est à recommander d'utiliser des bandes isolantes de bord.

Exemple d'installation avec élément de support de base Poresta® BF:

| | |
|--|----------|
| hauteur de montage/sol fini | 170 mm |
| Lambris intérieur universel Poresta® BFR | - 120 mm |
| 2 couches de colle pour carreaux | - 10 mm |
| élément de support de base Poresta® BF | = 40 mm |

 Per l'installazione, si deve utilizzare eventualmente elementi di supporto di base o uno zoccolo di pavimento gettato.

 Si deve osservare le direttive corrispondenti di lavorazione di tutti i mestieri partecipanti.

 Per l'installazione della rubinetteria, si deve osservare le istruzioni allegate del fabbricante (non compresa nella fornitura).

 È raccomandabile utilizzare fasce isolanti di bordo.

Esempio d'installazione con elemento di supporto di base Poresta® BF:

| | |
|---|---------|
| altezza di montaggio/ pavimento finito | 170 mm |
| Piastra scanalata universale Poresta® BFR | -120 mm |
| N. 2 strati di collante per piastrelle | - 10 mm |
| elemento di supporto di base Poresta® BF | = 40 mm |
